

HAWAII AGRICULTURAL PRODUCTS DATABASE Company/Product Listing Information

The Hawaii Department of Agriculture is pleased to offer you the opportunity to list your company in our agricultural products database. This database will expose a larger audience of potential buyers to the vast array of agricultural products offered by Hawaii producers and provide data for the distribution of information by the Department of Agriculture such as trade show information, potential sales leads and other items of possible interest. It is a searchable database that will allow the Internet user to search for companies by product, company name, products, island or services.

To qualify for a listing, the total value of your products must be at least 51% of Hawaiian origin, either raw product, added value or both.

There is no cost to Hawaii Agribusinesses for listing in this database.

If your company was previously published in the 1997 Hawaii Agricultural Export Directory or the Farmers, Chefs, Wholesaler Source Book, you are already listed in our internal and web databases. However, it is important for you to check that listing for accuracy and completeness and notify us of any necessary updates. You can do this by:

- A. Sign on to the internet and go to www.hawaii.gov/hdoa. On the right side of the screen in the box labeled "Spotlight", click on Hawai'i Agriculture & Food Products Directory.
- B. Enter your company name in the company name search box and click Start Search.
- C. If you are listed, your company summary information should appear in list view.
- D. Click the "More Info" link to view your Company Detail.

Review the information and notify us via this Information Sheet of any required updates.

If you cannot access the internet, please contact us to send you a printout.

If you have questions or comments, please contact us at:

Hawaii Department of Agriculture
