

Pest Control-Vertebrate Pests

KAUAI COMMUNITY COLLEGE - OFFICE OF CONTINUING EDUCATION

In Partnership with
State of Hawaii
Department of Agriculture

This course is applicable to all who are interested, and CEUs can be earned for those who hold applicator certification in categories: Private 1, Commercial 1a, 2, 3, 7c, 7d, 8, 9 and 10

Vertebrate pests include both birds and rodents, both of which are prevalent in Hawaii. Damage from these pests can be both economic and cosmetic and in some cases, quite significant. Given that these pests are so common, what tools do we have to control them? This class will provide an overview of the types of vertebrate pests in Hawaii, how to identify them and address both pesticide and non-pesticidal methods to control them, with a strong focus on Integrated Pest Management (IPM) as a technique.

Registration only
\$35.00
