

LEEWARD COMMUNITY COLLEGE

ORGANIC PEST CONTROL

WHAT YOU'LL LEARN

This class is intended to assist organic farmers in defining what "organic" means in regard to USDA certification, whether a pesticide is organic or not and what role the Hawaii Department of Agriculture has in regulating organic operations. Other hot topics of interest for organic farmers such as "Integrated Pest Management" and "How to Protect Pollinators" will be discussed. Regulatory requirements such as the Worker Protection Standard will be reviewed to assure compliance by organic operations.

**Call Lynne Constantinides at 455-0401,
