

TOP 10 IMPORTED COMMODITIES BY WEIGHT

Quarter 1: January - March 2016

This data was compiled by HDOA Research Statisticians tracking and analyzing imported commodities from air freight and cargo shipping manifests. This data can be used to help farmers fill gaps in Hawaii's local food markets and encourage residents to buy locally grown produce. Please note that import weights were collected from the shipping manifests and do not capture all the imports, however, the rankings are accurate, based on weights that were reliable.
