**HDOA Information on Slug and Snail Baits Available to Farmers in the State of Hawaii**

With the recent concerns over Rat Lungworm Disease, the Department of Agriculture has developed a list of State approved products to control both slugs and snails. The attached shows a list of products registered in the State of Hawaii that can be used by both the general public and farmers to manage slug and snail populations. As with all control applications, it is important to read the label and use accordingly. Local farmers must remember to maintain best management practices to provide healthy and safe farming environments.

Should you have any questions, I can be reached at 808-973-9550.

Sincerely,

A handwritten signature in black ink that reads "Scott E. Enright".

Scott E. Enright, Chairperson  
Board of Agriculture

Attachment

Dataset generated using the National Pesticide Information Retrieval System using the search criteria "Pest to be controlled, specific pest, slugs (all)".  
 It is the responsibility of the applicator to review and follow all label instructions.
