Coffee Acreage, Yield, Production, Price and Value State of Hawaii, 2021-2022

During the 2021-2022 season, utilized production value of coffee is estimated at \$61.9 million, 28 percent higher than in the previous season, and the second highest level ever recorded for the industry.¹

Hawaii coffee production totaled \$28.4 million pounds (cherry basis) during the latest season. Average coffee cherry yield increased to approximately 3,950 pounds per acre, up 12.5 percent from the previous season. Bearing acreage equaled 7,200 acres statewide, increasing by 400 acres from the previous crop year. Farm gate price for Hawaii’s cherry coffee averaged a record-high price of \$2.26 per pound, up 13 cents from the 2020-21 season. Overall, the last five seasons have seen a steady increase in the farm gate price of coffee cherries.

Utilized production of both parchment and green coffee also increased statewide. Utilized production in parchment coffee totaled 6.3 million pounds, 16% percent more than the previous season. The statewide farm price for parchment coffee averaged \$12.80 per pound, down 60 cents from the previous crop.

Total utilized production of green coffee reached 5 million pounds, up 16% from last year’s crop. Farm prices for green coffee reached an average of \$20.30 per pound; 4.6 percent higher than the last season.

Maui, Hawaii Island, Oahu, and Lanai have been affected by Coffee Leaf Rust (CLR) since October 2020. Although CLR has been introduced, growers continue to manage their orchards to control the disease. Despite this, coffee production area, volume and value have increased.²

Table 1: Coffee Acreage, Yield, Production, Price, and Value in Hawaii, 2017-18 to 2021-22

Season	Bearing Acreage	Cherry Basis							Parchment Basis		Green Basis	
		Yield Per Acre	Total Production	Utilized Production	Price	Value of	Percent		Utilized Production	Per Pound	Utilized Production	Per Pound
					Per Pound	Utilized Production	Harvested- Not Sold	Harvested- Not Sold*
